(57) Abstract			
<p>This invention relates to an isolated nucleic acid fragment encoding a disease resistance factor. The invention also relates to the construction of a chimeric gene encoding all or a substantial portion of the disease resistance factor, in sense or antisense orientation, wherein expression of the chimeric gene results in production of altered levels of the disease resistance factor in a transformed host cell.</p>

# INTERNATIONAL SEARCH REPORT

Int'l Application No

PCT/US 00/11956

## A. CLASSIFICATION OF SUBJECT MATTER

IPC 7 C12N15/82 C12N15/29 C07K14/415 C12Q1/68

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 C12N C12Q

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EMBL, BIOSIS, EPO-Internal, WPI Data

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	DATABASE EMBL [Online] ACCESSION NO:AQ161346, 9 September 1998 (1998-09-09) WING R.A.: "nbxb0006F06f CUGI Rice BAC Library Oryza sativa genomic clone nbxb0006F06f, genomic survey sequence." XP002146944 see sequence	1-4,16, 18

☒ Further documents are listed in the continuation of box C.

☒ Patent family members are listed in annex.

\* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family

# INTERNATIONAL SEARCH REPORT

International application No.  
PCT/US 00/11956

## Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
  
2. ☐ Claims Nos.:  
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
  
3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

## Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
  
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
  
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
  
4. ☒ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

1-23 all partially

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

## FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. Claims: 1-23 all partially

Polynucleotides from corn encoding CO11 polypeptides, and CO11 polypeptides as specified in SEQ ID NOS:1,2, and 15-18, chimeric genes, methods for selecting isolated polynucleotides, and obtaining nucleic acid fragments encoding disease resistance factors, compositions and methods for positive selection based on said sequences.

2. Claims: 1-23 all partially

Polynucleotides from rice encoding CO11 polypeptides, and CO11 polypeptides as specified in SEQ ID NOS:3,4,19 and 20, chimeric genes, methods for selecting isolated polynucleotides, and obtaining nucleic acid fragments encoding disease resistance factors, compositions and methods for positive selection based on said sequences.

3. Claims: 1-23 all partially

Polynucleotides from soybean encoding CO11 polypeptides, and CO11 polypeptides as specified in SEQ ID NOS:5,6,21 and 22, chimeric genes, methods for selecting isolated polynucleotides, and obtaining nucleic acid fragments encoding disease resistance factors, compositions and methods for positive selection based on said sequences.

4. Claims: 1-23 all partially

Polynucleotides from wheat encoding CO11 polypeptides, and CO11 polypeptides as specified in SEQ ID NOS:7,8, and 23-28, chimeric genes, methods for selecting isolated polynucleotides, and obtaining nucleic acid fragments encoding disease resistance factors, compositions and methods for positive selection based on said sequences.

5. Claims: 1-24 all partially

Polynucleotides from rice encoding L1s1 polypeptides, and L1s1 polypeptides as specified in SEQ ID NOS: 9,10,29 and 30, chimeric genes, methods for selecting isolated polynucleotides, and obtaining nucleic acid fragments encoding disease resistance factors, compositions and methods for positive selection, and method for evaluating the ability of a compound to inhibit L1s1, based on said sequences.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

6. Claims: 1-24 all partially

Polynucleotides from soybean encoding Lls1 polypeptides, and Lls1 polypeptides as specified in SEQ ID NOS:11,12,31 and 32, chimeric genes, methods for selecting isolated polynucleotides, and obtaining nucleic acid fragments encoding disease resistance factors, compositions and methods for positive selection, and method for evaluating the ability of a compound to inhibit Lls1, based on said sequences.

7. Claims: 1-24 all partially

Polynucleotides from wheat encoding Lls1 polypeptides, and Lls1 polypeptides as specified in SEQ ID NOS:13, 14,33-36, chimeric genes, methods for selecting isolated polynucleotides, and obtaining nucleic acid fragments encoding disease resistance factors, compositions and methods for positive selection, and method for evaluating the ability of a compound to inhibit Lls1, based on said sequences.
